The conference brings together researchers, scientists, and industry experts working in areas such as nanomaterials, energy materials, semiconductor devices, quantum materials, and advanced characterization techniques. AFMD promotes interdisciplinary collaboration among physics, chemistry, materials science, and engineering to accelerate innovation and translate fundamental discoveries into practical technologies.

AFMD - 2026 aligns with the United Nations Sustainable Development Goals (SDGs) by supporting research that contributes to **Affordable and Clean Energy (SDG 7)**, **Industry, Innovation and Infrastructure (SDG 9)**, **Responsible Consumption and Production (SDG 12)**, and **Climate Action (SDG 13)**. The conference also promotes **Gender Equality (SDG 5)** and **Reduced Inequalities (SDG 10)** by encouraging inclusive participation, equal opportunities, and global collaboration among researchers from diverse backgrounds.
